DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Debaigt (U.S. Patent No. 4,040,715). With respect to claim 1, Debaigt discloses (in Fig. 1) a switching device for the connection of a conductor by means via a ring terminal (8), comprising: a preassembled component (6, 9, 14) including a holder (9) and a screw-with-washer assembly (6, 14), the screw-with-washer assembly being held by the holder and forming, together with a connection piece (4), a clamping point for the conductor connection via the ring terminal, the holder being movable between an open and a closed state of the clamping point and including a spring element (middle part of 9) applied to the holder, which holds the holder in the open state when the clamping point is released.

With respect to claim 2, Debaigt discloses (in Fig. 1) the component being not provided with a cover.

With respect to claims 3 and 5, Debaigt discloses (in Fig. 1) the component being guided and held via guide grooves (5, 10) during assembly.

With respect to claims 4 and 6-7, Debaigt discloses (in Fig. 1) the complete clamping device being in the form of a module, the switching device being plugged on, and the spring element being prestressed over a narrow point (2) in the switching device.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Furnas (U.S. Patent No. 2,233,124), Isobe et al. (U.S. Patent No. 6,193,566) and Shibata et al. (U.S. Patent No. 5,704,815) disclose connectors similar to Applicant's claimed invention.
